## **Bor-Shyue Hong**

JAN 27, 1939 - MAY 27, 2013

**D**r. Bor-Shyue Hong was a professor of biochemistry, and a director of research at Alcon Laboratories. He was also a loving husband, father of two, and grandfather to five grandchildren. As a man of great contributions to both science and family, he will be dearly missed by friends, colleagues, and family. Dr. Hong was diagnosed with combined hepatocellular-cholangiocarcinoma (HCC-CC), a rare form of liver cancer, just a short month before his passing. As is often the case in liver cancer, any indication of potential abnormality only arose at a very late stage. We hope that ongoing research can help to provide better approaches for early detection of liver cancer and improve survival for today's liver cancer patients.

**Bor-Shyue Hong**

JAN 27, 1939 - MAY 27, 2013

**Andrew Chung** posted:

Dear Louise, Karen, Chris, Chiamei, and all Family: Please accept our deepest sympathy on the death of your beloved husband, father and grandfather. Dear Bor-Shyue has excellent accomplishments in life. You can all be proud of him. Now he is set free, as a Chinese poem describes: You ask what my soul does away in the sky, I inwardly smile but I cannot reply; Like the peach-blossom carried away by the stream, I soar to a world of which you cannot dream. We believe he is still comforting you and protecting you forever! Sending you Lots of Love, Andrew, Shu-Mei, Iris
